Teaching with Schrödinger

Schrödinger's suite of software is now easily accessible to students and educators.

About
- Build, calculate, and analyze structures for teaching purposes using web-based Maestro (Small Molecule Drug Discovery, Biologics Discovery, & Materials Science)
- No need for students or instructors to download software—access is through a virtual desktop environment via a web browser

Support
- No computational experience? No problem! We will provide support for students and instructors on how to use the Maestro interface and perform basic functions
- Included with a purchase are in-class demos with a Schrödinger Education Team member

Resources
- Educational materials in a variety of chemistry and biology subjects at the undergraduate and high school levels (i.e. General Chemistry, Organic Chemistry, Medicinal Chemistry, etc.)
- Readily available lab assignments, lesson plans, and worksheets with computational exercises for students and instructors to use

1. Login
Instructors and students use their user credentials to login using a web browser.

2. Open Maestro
Access industry-grade, web-based Maestro directly on the virtual workstation.

3. Learn
Import or build, calculate, visualize, and analyze structures using lesson plans.

Contact the Education Team at teaching@schrodinger.com for more information or visit www.schrodinger.com/teaching-schrodinger.
How to get access

1. Virtual cluster access is purchased on a per-student basis in a class with a minimum of 10 students.
2. Schrödinger will email user credentials and login information to participants.
3. Instructors and students can login through a web browser and use the software anytime during the purchased academic term.
